Protective Packaging Solutions

AIRSPEED™ 5000 VOID FILL SYSTEM VALUE PROPOSITION

The AirSpeed 5000 system produces pillows on-demand for void-fill, cushioning and containment needs. Products of all shapes and sizes receive the utmost protection from shock, abrasion and vibration during transit. Since the inflatable pillows come flat in rolls, storage is efficient and cost effective; packers use only the amount they need for the application at hand.

AirSpeed 5000 is easy to use and offers speed, versatility, durability and functionality. Chains of air cushions are created using ambient air, eliminating the need for an external air supply source making the unit truly portable. Our reliable machines and high performance film create the perfect combination for meeting customer needs, when and where they are required.

Features and Benefits:	Results:
Blazing speed	75 feet per minute; no need for bulky storage/dispensing systems.
Portable	No compressed air needed.
Compact	Easily fits into any packaging operation, large or small.
Easy to operate	Load film and start machine.
Low maintenance	Minimal wear items mean outstanding reliability.
Versatile	Single system produces inflated cushions of varying lengths and air fill levels, customized to fit your needs.
Productive	Integrate with an AirSpeed accessory for maximum productivity and ergonomics.

ENVIRONMENTAL ADVANTAGES WITH MAXIMUM QUALITY

Inflatable pillows are a superior, cost-effective alternative to foam peanuts, bubble packaging and paper fill systems in providing protection to a variety of items during shipping. AirSpeed 5000 films are made from low density polyethylene making it 100% recyclable, preserving the world's precious virgin raw materials.

Film Features and Benefits:	Results:
Durability and air retention	Excellent puncture resistance and sealability.
Truth in sizing	Pregis films yield 10 – 20% more void fill than competitive films due to minimum "skirt loss".
Transparent, clean and neat	Improved customer satisfaction, cleaner than loose fill or kraft paper; customers can see the product packaged and avoids "lost" items or throwaways.
Non-abrasive	Soft, smooth film surface; eliminates paper cuts.
100% recyclable	Recycling category #4. 
Sustainable film option	Recycled content film available with a bio additive blend that accelerates biodegradation.

ERGONOMIC AND EASY TO USE

Easy Operator Interface Control Panel

- Start/Stop
- Air-Fill Control
- Run Modes
 - Manual Operation
 - Predefined Batch
 - Automatic Fill
- Lock Out Feature

THE PREGIS SYSTEMS OFFERING

Proven, high performance films and cost effective machines make Pregis systems the preferred solution and leading systems offering in the industry today.

AIRSPEED™ SMART™ COMPACT VOID FILL SYSTEM

- Small, flexible footprint
- Simple start/stop operation
- Perfect for small or decentralized work stations
- Reliable with minimal wear items

AIRSPEED™ HC HYBRID CUSHIONING SYSTEM

- Fast! Runs at 75' per minute
- Excellent film clarity and configuration
- No material wasted at perforation
- Adjustable air pressure and multiple film sizes

GEOSPEED™ PAPER PACKAGING SYSTEM

- Biodegradable, recyclable, and renewable resource
- Great for small voids, unboxed or sharp items
- Photoeye feature increases flexibility and efficiency
- Tight crumple pattern for maximum protection

AIRSPEED™ 9000 ENGINEERED CUSHIONING

- One-step process reduces labor
- Saves warehouse space
- Reduced cubing saves freight
- Outstanding air retention, puncture resistance and cushioning
